

BUSINESS SOFTWARE "FOR THE WAY YOU WORK"

CENDEC's CORE Remote

Connected or off-line, tracking daily field costs, work orders, event detail capture, and auto-sync eliminates spreadsheets, over-stock situations, and provides daily actual field costs. The ability to compare and take action on analysis of budgeted, projected and actual project costs integrates decision making relative to the original AFE. CORE Remote provides:

- **TRACKING** – the backbone of our system – from events to estimates and all the work in between CORE Remote provides the daily capture of vital cost based information to ensure confidence and efficiency in decisions related to operations.
- **NOTIFICATIONS** – track and ensure information is acted upon through your corporate email system.
- **WORK ORDERS** – whether it is multiple work orders assigned to an asset or the ability to capture events while on site, field operations can continue while disconnected. Work Requests can be generated as well to be scheduled when required.
- **ACCURATE BUDGET** – provides the ability to see accruals at the filed level as commitments and invoices are entered daily.
- **CONTRACT MANAGEMENT** – ability to track and evaluate contracts including risk analysis, document management and approvals.

A robust set of auditing tools ensures complete tracking of historical records for any transactions.

Benefits of CORE Remote

- **INVOICING** – reconciliation of invoices for services are done more efficiently and in a timely manner. Capturing this information at the field level ensures a reduction in billing errors and enhances the approval process. Quicker turn around for payment allows for accurate view of daily field costs.
- **CHECKLISTS AND FORMS** – track and report on various checklists, forms and inspections. This can be set up based on company requirements to capture events, hours, and incidents.

CENDEC strives to design systems that are intuitively arranged from the users' perspective and compatible with their work requirements. Our systems combine accuracy, consistency and superior functionality with flexibility and ease of use.

- **MAINTENANCE MANAGEMENT** – provides the ability to improve maintenance efficiency and effectiveness while coordinating and integrating with maintenance scheduling.
- **COMMUNICATION** – ensures that a coordinated effort in planning, delivery, and reporting on service at the field level is established. While disconnected all required information is captured and when synching new information can be provided. With this integration to the notification functionality confidence that within the dynamic nature of field operations and service a comprehensive view is provided.
- **BUDGET VS ACTUALS** – invoicing and service work are now attached to the appropriate purchase orders where reconciliation can happen daily. At the end of the previous days close, CORE provides a comprehensive view of consolidated field operations and financial information. This provides the ability to compare actuals to budget based on the original AFE.

TIMECARD TRACKING – track timecards, approvals, overtime and other time associated costs related to filed service and operations.

CENDEC's products are multi-company, multi-language, multi-currency and have been integrated with many other applications including Financial, Accounts Payable, HR, SCADA and GIS systems. Call us to see how CENDEC's real-world practicality can make your operational processes easier and cost-effective.
