- Project Notifications
- Reporting

Business Rules

- Determines when e-mail is triggered
- Ability to enforce response values
- Defines timeframe for responses
- Determines response actions
- Facilitates process workflow
- Can utilize multiple data sources

E-mail Notifications

- Platform Independent
- Customizable Messages
- Enforceable Responses
- Recurring or One Time
- Expiry capability for response

E-mail Responses

- Configurable updates based on responses
- Full time stamp and audit tracking
- Sent from PC or mobile devices with e-mail capability
- Confirmation capability

Resources can process and update documents from any location, whether it is at the office or in the field, quicker and more efficiently than having to access individual systems separately.

Cendec's products have been integrated with many other applications including Financial, Accounts Payable, HR, Scada and GIS systems. Let us show you how we can make your applications more effective by adding work flow and e-mail capability.
