Operations Resources Environment

BUSINESS SOFTWARE "FOR THE WAY YOU WORK"

CORE Enterprise Application

Cendec's CORE System

CORE eliminates costly duplication, unnecessary purchases, and over-stock situations with its impressive array of operational management features:

- CORPORATE CATALOGUE – the backbone of our system – ensure the classification, description and numbering of every item and the addition of any item to any warehouse, requisition, quotation, purchase order, inventory location, or fixed asset location
- INVENTORY DATA MANAGEMENT AND TRANSACTIONS – track and inventory individual items by warehouse, bin and item condition; maintain inventory values by average cost, FIFO or LIFO in single or multiple currencies
- AFE AND PROJECT MANAGEMENT – manage complex projects by tracking various stages , what needs to be done and the materials and services required.
- FIXED ASSET DATA MANAGEMENT – track and evaluate all fixed assets
- MATERIAL MOVEMENTS AND TRANSFERS – manage the movement and value of assets and inventory
- PROCUREMENT MANAGEMENT – a robust suite of procurement functions including Requisitions, Bids/Request for Quotes, purchase orders, contracts, purchase agreements, service orders, service agreements, rental orders, consignment orders, repair orders
- CONTRACT MANAGEMENT – ability to track and evaluate contracts including risk analysis, document management and approvals.
- POWERFUL QUERY AND REPORTING FUNCTIONS – focus on individual reports, or utilize dashboards to see the big picture –easily dump information to Excel for further analysis or to evaluate what if scenarios to suit your needs

- MAINTENANCE MANAGEMENT - CORE helps track and analyze all maintenance functions. The system's ease of use ensures that accurate information is captured, enhancing an organization's preventative and predictive maintenance programs. With accurate information, organizations can also ensure that their maintenance is cost-effective, limiting the risk involved in expensive breakdowns.
- EQUIPMENT MASTER AND MAINTENANCE LOCATIONS – maintain specific information about locations/equipment including drawings, characteristics, location and hierarchical structure.
- TASKS AND WORK PACKAGE LIBRARIES – ensure consistent procedures; permits users to attach planned time, materials and other costs

Cendec strives to design systems that are intuitively arranged from the users' perspective and compatible with their work requirements. Our systems combine accuracy, consistency and superior functionality with flexibility and ease of use.

- PREVENTIVE MAINTENANCE – schedule and generate work orders to user specifications; accommodates any number of predictive, preventive or seasonal requirements
- TREND ANALYSIS – track and report an unlimited number of characteristics for items or maintenance location
- CUSTOMIZABLE CHECKLISTS AND FORMS – track and report on various checklists, forms and inspections .
- WORK REQUESTS / WORK ORDERS – submit work requests for equipment or maintenance locations directly into the system. Generate work orders, get information quickly from a single screen
- RESOURCE SCHEDULING – assign individual resources to a task on a work order using resource availability and calendars already in the system.
- HSE AND CERTIFICATIONS - Track resource certifications who has what and when are they due, as well as HSE compliance documents.
- WEB TIMECARD TRACKING – track timecards , approvals, overtime and other time associated costs.

★★★★★★★★★★
